HTML 5 Basic Content Elements with some Simple CSS

- Heading and Paragraphs
- Special Characters
- Lists
- Tables
- Images
- Hyperlinks

HTML page without CSS styling looks a bit boring!!

Heading and Paragraphs

Heading and paragraphs are BLOCK elements

Heading

There are 6 levels of heading. Headings are logical marked. Do not skip levels. If you want to change the size of a heading, don't change its level - change the CSS.

Paragraph

Paragraph contain the body text of a web page. You cannot put another block element inside a paragraph.

Special Characters

Whiel HTML support many name special character like ®(#174), XML only supports 5 namely: " ' & < and >. So to keep your HTML compliant you need to use numbers for all the others.

List

There are two types of list: unordered and ordered lists

- First bullet point
- Second bullet point
- Third bullet point

1. First item
2. Second item
3. Third item

List can be also nested inside each other

- ## Tables

Month	Savings		
	Salary	Interest	Total
Jan	\$60	\$40	\$100
Feb	\$40	\$40	\$80
Grand Total			\$180

Month	Savings		
	Salary	Interest	Total
Jan	\$60	\$40	\$100
Feb	\$40	\$40	\$80
Grand Total			\$180
